

All About Our Learning Approach at Bluebells!

Our ethos is to...

'Inspire a love for learning through a play-based approach and in a home-from-home environment.'

Our Mission Statement

Bluebells strives to provide quality, affordable, and stimulating childcare that is accessible to all families within our community.

Creating a 'home-from-home' environment for our children, staff, and parents alongside a teaching approach that inspires a love for learning is of the utmost importance to us.

We will give all children the opportunity to reach their full potential by providing a wide range of activities and experiences that reflect a multicultural and non-discriminatory perspective.

What is Our Goal?

By the time children graduate Bluebells, we aim for them all to be happy, independent, confident, and resilient individuals who have love for learning.

How We Achieve This

Monthly Topics

Activities and experiences occasionally reflect the monthly topic in hopes to support Cultural Capital. These activities also include aspects of the children's interests.

Continuous Provision

Children have access to a broad range of well-resourced and stimulating activities during free play, in which they have the opportunity to explore freely.

Following the Children's Interests

The activities and experiences provided reflect the children's interests in hopes to inspire engagement and developmental progress.

Key Worker Approach

Children are assigned a key worker who is responsible for creating an enabling environment that reflects the interests and supports progress towards individual 'next steps' for their key children.

Open Ended Activities

We strive to provide open ended activities that encourage children to become creative, independent thinkers, and confident in their own abilities. We endeavour to promote child-led play.
